

OUR STORY

Spread The Joy was created through Innovative Community Support Services. ICSS provides support and practical education for adults with developmental disabilities and mental health concerns, who face barriers to sustainable and meaningful employment. Spread The Joy is one aspect of how ICSS looks to remove some of these barriers.

Spread The Joy allows opportunities for meaningful programs, employment, community connections and a spotlight for peoples' abilities to shine.

This wonderful program was designed to offer meaningful creativity and empower all of the people who attend the program by including them in all aspects of the small business from product creation, production, marketing, and management. Spread The Joy is their dream, vision, and passion come to life!

Spread The Joy is a social enterprise that was created and is operated by adults who are supported by ICSS. All profits from the sales of Spread The Joy products are invested back into ICSS supports and services.
